Herkules has designed and manufactured "technique for people" since 1974. In close co-operation with users "on site", we create workshop equipment which is economically smart with and through its ergonomics.

Superior technique setting standards: Lifts for paint- and bodyshops, automatic spray gun cleaners, dust extraction units. These are all examples for products which have become state of art for modern, future-orientated workshops.

The Herkules concept "technique for people" has been successfully incorporated. The products are worldwide highly acknowledged and distributed.

A selection of people and brands relying on us:
Akzo Coatings · Audi · BMW
Deutsche Bahn AG · Ford · Glasurit
Nexa Autocolor · Lufthansa
Volkswagen · Opel · Daimler AG
DuPont · Axalta · Porsche · Standox
Spies Hecker
By means of the newest tools and machines, Herkules produces and manufactures high quality paint- and bodyshop products at our headquarters in Kassel. Thanks to numerous user experiences, innovative technology and well-planned concepts, Herkules is able to make the products suit the high demands on the market.

The quality of our products - expressed through a 3 year guarantee on all lifts - is ensured during the entire production in Kassel. The lifts and the dust extractions are all 100 % made in Germany.

We would like to invite you to our exhibition and training centre in Kassel, where you can see and test all of our products.

Welcome!

Herkules is delighted to present some new products to you in this catalogue. They are all of the finest Herkules-quality, and loyal to our concept “technique for people” - this is not only our corporate philosophy, but also a promise to our customers.

The approved lifts HLS are available in three types for different demands.

All of them have:
• Stepless lifting heights
• Due to low construction height easy to drive on
• Simple access to interim drive over ramps and deviate loading ramps
• ATEX option with pneumatic lifting technology
• 3 years lift warranty

The easy installation facilitates an individual planning of body shops by using the existing space optimally.

Flush mounted with low pit depth.

Quality is increased by ergonomic work in an uncramped posture.

The lift HLS as in-ground installation in the spray booth.
Nearly 85% of all car damages require the worker to work in a stooped position. This causes fatigue and can also lead to long-term health problems. With the special paint-lift, the work can be done in an ergonomically correct upright position.

The work efficiency is increased and the quality is improved by better visual control opportunities.

**on-ground**
Simply fix with screws and dowels, and the lift is ready for immediate use. Item No.: HLS1200-11

**flush mounted**
Flush mounted to concrete or grids. Item No.: HLS1200-14

**rail transport**
Lift for rail transport. Item No.: HLS1200-13

Pit measurements on demand.
The intelligent construction with the innovative extras and the extended lifting height makes the HLS-1600 the perfect professional lift for the future-oriented paintshops. Thanks to its compact construction, the lift is also suited for smaller workshops. Due to its fold down driving tracks and a drive-on ramp which is level with the rest of the lift, working with the HLS-1600 is easier than working with many other lift types.

**Technical data:**

- **Loading capacity**: 3 to 800 kg

Advantage of the lifts: The ergonomic work and the good visual control opportunities increase the efficiency and ensure the health of the employees.
HLS 3200

The lift with 3.2 to loading capacity

The HLS 3200 is with a loading capacity of 3.2 to constructed for heavy vehicles. This creates a safe work and provides the possibility also for SUVs and small vans.

The extended platform allows the lifting also for extended vehicles. The smooth lifting increase the access to damaged areas and the ergonomic work process.

on-ground
Ready to use immediately. With ramps easily accessible.

Item No.: HLS 3200-11

flush mounted
Optimal flush mounted installation. It is particularly advantageous for new buildings.

Lifts HLS Duo
Two lift systems perfect combined

One lift - two possibilities:

The approved HLS lifts are available in three types for different demands. All of them have:
- Stepless lifting heights
- With ramps easily to drive-on
- Simple access to interim drive over ramp and deviate loading ramps
- ATEX option with pneumatic lifting technology
- 3 years lift warranty

Lifted on the wheels

The deviate loading ramps make the access to the panel so easy.

Wheel free lift

The stepless lifting height secures the ergonomic work process in the upper position.

Easy positioning of the lifting points also of extremely flat vehicles.

Loading ramps secure against fall down.

*The shown fold down supports are only for the on-ground version.
The workshop lifts for almost all standards. The lifting of the car could be either on wheels or for wheel free work.

Uncramped posture and better visibility improve quality thanks to different working heights that can be changed smoothly.

Due to its fold down driving tracks and ramps which is level with the rest of the lift, working is easier.

**on-ground**

Item No.: HLS1200-Duo-11

- Loading capacity: 2.5 to
- Weight: 850 kg
- Air supply: 8 bar
- HLS 1200-DUO-11:
  - Working height: ~1100 mm
  - Object height only: 110 mm
  - Construction height with arms: 155 mm
  - Lifting height max.: 930 mm

**flush mounted**

Optimal flush mounted installation. It is particularly advantageous for new buildings.

Item No.: HLS1200-DUO-14

- Working height: ~1000 mm
- Pit depth: 115 mm
- Lifting height max.: 825 mm

**Technical data:**

Loading capacity: 2.5 to
Weight: 850 kg
Air supply: 8 bar

HLS 1200-DUO-11:
- Working height: ~1100 mm
- Object height only: 110 mm
- Construction height with arms: 155 mm
- Lifting height max.: 930 mm

HLS 1200-DUO-14:
- Working height: ~1000 mm
- Pit depth: 115 mm
- Lifting height max.: 825 mm
HLS 3200 Duo

The double system lifting platform with increased lifting power

With 3.2 to loading capacity and the extended platform size the HLS Duo 3200 is also made for heavy vehicles and small vans. Thanks to the extractable ramps (only on-ground version) a safe lifting from small to large vehicles is always attainable.

With the double functionality as standard lift as well as wheel free lift a multifunction workplace is realized.

Cross beam
The safe free-lift for large vehicles

For the wheel free-lift of large vehicles the cross beam is the applied solution, where the lifting points of the swivel arms are exceeded.

The cross beam will be placed on top of the swivel arms and is an option for the HLS 3200 DUO and and the RS 3 to.

The drive on ramps are adjustable in four catches. For this reason the lift can be adapted to the required wheel base.

Also the stopper ramps are adjustable in four catches. With extracted ramps the base is 3450 mm long.

The safe working level is ensured with maximum extraction.

Item No.: 300-375

A single worker can place the cross beam on top of the swivel arms.
The HLS 1600-U allows the lowering of the car in the booth ground for easy work in the roof area. This increases the productivity and the safety of the lift.

- Regular lifting for an ergonomic work at the vehicle
- Comfortable work on the top of the vehicle thanks to the immersion of the lift into the gratings of the booth or into the body shop without ladders or other insecure tools
- Smooth lifting and lowering to desired working height
- Perfect for SUVs (sport utility vehicle) and Vans

Item No.: HLS1600-15

**Technical data:**
- Loading capacity 3.0 to
- Length of the platform 4030 mm
- Width of the platform 1985 mm
- Depth of the pit 475 mm
- Weight 920 kg
- Air supply 8 bar

Optimal approach to the vehicle and to the top of the vehicle.

The HLS1600-U lifted for the work on the lower part of the vehicle.

Working height ~ 850 mm

The HLS1600-U on the bottom for an easy access.

The HLS1600-U immersed for the work on the upper parts of the vehicle.

Recessed depth up to 300 mm
Herkules HLQ
Drive-over lift with trolleys for side transportation

For spraybooths equipped with trolleys for side transportation. Safe vehicle lifting on its wheels.

Work under better visual conditions without fatigue. While lifted, even the lower parts of the car can be reached comfortably with the spray gun. This increases the work efficiency and improves the quality.

Item No.: HLQ-01

While on the trolley, the vehicle is lifted on its wheels. When the lift is lowered, the trolleys are guided into the rails.

The vehicle can easily be pushed sideways into the drying chamber. The lift can be used for the next vehicle.

Optimal use of existing space by sideway transportation in the body shop.

Technical data:
Loading capacity  2.5  to
Weight            500  kg
Air supply       8  bar
Working height   ~ 800  mm

The flush-mounted lift is prepared for the installation into grids with adjustment to the existing rails.
Transmobile
Rail-free handling and transportation system

The transportation system consists of the remote controlled automotive transmobile, and the lift HLS and HLS Duo. Can be used in any shop with a level surface - even in the spraybooth with grid floor. The use of the Transmobile pays off: better workshop utilisation, lower wage costs and a great amount of time saved.

The revolutionary system for modern paintshops. Thanks to a quicker and safer work routine, the Transmobile creates new capacity. The Transmobile drastically reduces the work involved in vehicle transportation around the shop. Your benefit is an even better used time for new jobs.

- Reduces vehicle transportation times
- Can easily and safely be operated by only one person
- Makes the most of your space thanks to its tight entry angle
- Powerful self-drive with no harmful exhaust gases
- Covered vehicle surfaces remain undamaged
- Final cleaning of vehicle interior is no longer necessary
- Our product makes your work easier and increases the work quality

Technical data:
Loading capacity  2.5/3.2  to
Weight           560/600  kg
Drive            24  V

Messe
Frankfurt

3 years lift warranty  100% MADE IN GERMANY

CE
Moving the vehicles through tight spaces is easy and safe.

Can be used in any shop with a level floor - even in the spraybooth with grid floor.

The lifts for Transmobile are made for use with moving transport – easy to use.

The remote control is easy to use.
The new development for the state-of-the-art paint shop.

Safe lifting for all works around the car.

- Smooth lifting and lowering
- For prep area and spray booth
- Easy to move
- Low space requirements
- More safety for your employees

### Painter 01
- Working height up to 3.25 m
- Platform dimensions 2000 x 700 mm
- Loading capacity 150 kg
- Item No.: Painter-01

### Painter 02
- Working height up to 4 m
- Platform dimensions 3500 x 700 mm
- Loading capacity 150 kg
- Item No.: Painter-02

### Painter 04
- Working height up to 4 m
- Platform dimensions 2000 x 700 mm
- Loading capacity 150 kg
- Item No.: Painter-04

### Painter 05
- Working height up to 4 m
- Platform dimensions 3500 x 700 mm
- Loading capacity 250 kg
- Item No.: Painter-05

Air supply 8 bar
Painter secures safe standing and ergonomic working position for painter when working at higher vehicles.

The painter is easily moveable with the wheels. Both at prep work and spray booths – excellent for small spaces.

On the platform are several air supplies as well as storage space for the tools. Therefore they are always within reach.
A fast mobile lift for service jobs with interchangeable lifting devices.

Herkules-lift mobile

The lift is ready for immediate use - no installation necessary! With an additional set of wheels it is mobile in the shop.

- Fast lifting
- Ergonomic lifting height
- Various possibilities of use
- Small space requirements
- No installation required
- Operated solely by air pressure

on-ground
Ready for immediate use. Item No.: HM1100-01

flush mounted
Optimal in-ground installation. Item No.: HM1100-04

With wheels and pole handle (optional) it can be moved around at any time.
The swivel arms easily reach the vehicles’ original lifting points. All swivel arms are moveable horizontally at the lift.

The lifting dishes negotiate a distance of 140 mm height and they are moveable at the swivel arm.

The radius of the swivel arms allows also the safe fixing of wide vehicles.

Technical data:

- Item No.: HM 1100-01
  - Working height: ~1100 mm
  - Object height: 115 mm
  - Lifting height: 930 mm

Tyre service lift
Herkules-lift RS

Due to the low construction height, the easy positioning of the blocks through outside markings and the high lifting speed, the lift enables you to service more vehicles in a short time. This increases the productivity of your shop, especially in the high seasons.

• 2.5 to lifting capacity
• No installation required
• Ready for immediate use
• Operated solely by air pressure
• Mobile with handle and wheels (optional)

Item No.: RS570-01

Safe lifting every time thanks to the easy fixing of original lifting points. If ramps are removed, short wheel based cars can also be serviced.

The lift is equipped with telescoping arms, and therefore it is also suitable for small vans and cars with long wheel distance.

Tyre service lift
Herkules-lift RS 3 to

Due to the increased lifting capacity and the big lift plate, fast tyre fitting is not a problem even for large vehicles. Due to the low construction height and the fast lifting speed, the Herkules-lift RS 3 enables you to service more vehicles in a short time. This increases the productivity of your shop especially in peak seasons.

The lift is ready for immediate use—compressed air supply and a level floor is all you require.

Item No.: RS-3T-01

- Loading capacity 3 to
- Non-damaging access due to a low drive-over height
- Swivel arms easily reach the vehicles’ original lifting points
- Smooth pneumatic lifting up to 500 mm
- No damage to vehicle wheels due to rounded-off angles of the swivel arms
- Side foot protection plates guard the operator
- No installation required

Immediate use without installation

With the cross beam (page 13) the lifting points of large vehicles are ensured.

Herkules-lift K 700
Increased lifting height - more possibilities

The K700 is an universally applicable lift for tyre service workshops. The lifting height of 930 mm allows an ergonomic work at a height of approx. 1100 mm for all work to be accomplished at the tyre service, brake-service or tuning operations.

With a loading capacity of 2.8 to the K700 is also suitable for work on heavy Limousines and SUV’s.

- Loading capacity 2.8 to
- Non-damaging access due to a low drive-over height
- Swivel arms easily reach the vehicles’ original lifting points
- Smooth pneumatic lifting up to 930 mm
- Ergonomic work in upright position
- No damage to vehicle wheels due to rounded-off angles of the swivel arms
- No installation required
  Immediate use without installation

Spray gun cleaning machines at the highest level: **Cleanpoint**

The innovation.

The patented magnetic gun holder fixates a spray gun in a position where the gun’s air channels are protected. The air channel is free connected to the solvent entering, so there is no longer the risk of solvent entering the air channels.
Cleanpoint

The superior cleaning system for the painter

- **Fully automatic gun cleaning** inside and outside.
- Improved cleaning performance and more features.
- **Magnetic gun holder** fixates the gun in an optimal washing position.
- **Simultaneous** manual and automatic cleaning of up to 4 guns.
- Convenient handling due to ergonomic design.
- Persuasive design in quality stainless steel.
- For solvents as well as water.

The workstation is equipped with a manual brush for recirculation solvent and with a spray gun with clean solvent.

Attractive design and impressive functionality. The magnetic holder for the spray gun can be individually placed - whether inside or outside of the unit.

Easy control by foot pedals. The powerful components of the simultaneous cleaning are guaranteed up to four spray guns at the same time.

The innovative washing room for the automatic wash process: The Auto-Box. The powerful wash pumps and the high efficiency of the nozzles make the washing result more efficient consuming less solvent.

Another major innovation is the magnetic gun holder. The new magnetic gun holder pulls the trigger to open the paint channel and fixates a gun in seconds, in one simple step. It fixates the gun in a position where the gun’s air channels are protected, facing downwards, so there is no risk of solvent entering the air channels. Through clever design, there is no longer any need for separate extension tubes, trigger clips, air purge lines etc.

All commercial containers (60 liters) can be easily ranked in the trolley. Each trolley is designed with a tray as overflow protection.
Cleanpoint

**CP-Quattro**
A complete solution for solvent based paints. Two automatic washing chambers and two basins for manual cleaning in one machine.
For solvents Item No.: CP-QUATTRO

**CP-Duo**
All components for automatic and manual cleaning in one device.
For solvents Item No.: CP-DUO

**CP-Uno**
Compact station for manual cleaning with a brush and a spray nozzle.
For solvents Item No.: CP-UNO

**CP-Duo-Aqua**
All components for automatic and manual cleaning in one machine. For water or water-based solvent (e.g. Aquasolve)
Item No.: CP-DUO-AQUA

---

**Technical data:**
- Weight CP Quattro 95 kg
- Weight CP Duo 75 kg
- Weight CP Uno 70 kg
- Weight CP Duo Aqua 65 kg
- Compressed air supply 7-12 bar
- Solvent pressure 2 bar
- Capacity pump 10 l/min.

Subject to technical changes.
Extraction solutions are available (optional)

---

**AquaSolve**
The new concentrate for the water-based gun cleaning.
- Makes cleaning quick and easy
- For the automatic cleaning
- Anti-corrosion additives and cleaners to protect the spray gun
- Long-lasting cleaning action
- Disposal by coagulation remains
- Applicable for all color brands

Item No.: DH-230120
Herkules Aqua-Rinse

The clean station for the quick colour change of water borne paint

The clean station is special designed for the disposable cup systems. The proper cleaning for spray guns is the result of spray out, rinsing and drying. All functions are integrated in one compact solution.

Leaving the spray booth to clean the spray gun is time consuming and inconvenient. Proper cleaning means better quality after each paint change.

Equipment features:

- Paint spray out funnel
- Paint channel rinse nozzle activates pump when pressed
- Air cap brush
- Air gun for drying the spray gun
- Diaphragm pump
- Clean water container

Item No.: DH-QR-10

Spray out the remaining paint

Rinse the paint channel

Wipe the air cap

Dry the gun
Lacky Table
The preparation table for the paintshop

Herkules Lacky table
This table is made of stainless steel and has a lot of storage space for painting materials and tools. Everything is at your hand, saving both time and effort.

The lowered working surface prevents solvent overflow. It has also got an outflow tunnel for pouring into a collecting tank. A paper roll holder is available as an accessory.

Optimum solvent extraction:
Thanks to the defined extraction at the bottom of the working surface, reliable extraction is possible. The solvent particles concentrated at the bottom are optimally drawn off through strong suction.

The extraction system can be connected to an already existing system. Herkules has a pneumatic extraction system available as an accessory.

Technical data:

Paper roll holder and extraction system available as accessories.

Paint stand

Herkules paint stand
The quick and safe painting and assembly stand for paint- and bodyshops.

- Has a wide range of adjustments
- Robust but easy to handle
- Extendable

Item No.: BL-01
Drain station

To collect residue of lacquers

The Herkules drain station is the cost-saving add-on unit for automatic spray gun cleaning systems. Drained guns and cups go easy on the cleaning agent in the system. The increased service life saves a lot of resources.

- Thanks to the increased service life it saves solvents
- With blow-out channel for cleaning the gun interior
- Suitable for conventional and waterbased materials
- Clean workstation
- Optional extraction system is available as an accessory

Item No.: CP-TG01

The residues of lacquers are collected in a canister. An optional exhaust avoids odour and healthrisks.

The residues of lacquers are collected in a canister. An optional exhaust avoids odour and healthrisks.

Spray guns and paint cups are simply placed in the drip openings.

Spray cups will just be placed above the drain opening.

Herkules Hexadust
dust extraction system

Vacuum dust extraction solutions for workshops of any size. An individual analysis of your workshop setting will let us configure the ideal set up for your shop.

The Hexagon energy head or alternatively the multifunctional terminal will provide work places with vacuum power, air pressure and electricity. The standard automatic start and stop enables healthy working, a clean workshop and energy savings.

NEW!
Multifunctional terminal
Up to 2 sanders at the same time.
240 V Art.Nr. C1C-240
400 V Art.Nr. C1C-400

T 2 - Turbo
Up to 2 sanders at the same time.
Item No.: E1W

T 2 - Turbo
Up to 2 sanders at the same time.
Item No.: E1S

T 4 - Turbo
Up to 4 sanders at the same time.
Item No.: E1C

T 6 - Turbo
Up to 8 sanders at the same time.
Item No.: E3K
The Hexadust dust extraction provides all working places in the workshop. The Hexagon energy head is compatible with all sanding tools.

**Single- or multiple user system?**

We’ve got them both and would be happy to consult you about your choice.

Automatic system start for both air and electrical tools as well as an automatic pneumatic filter cleaning are standard equipment.

With Hexadust dust extraction systems you have the choice between Hexagons with ceiling or wall assembly as well as swivel arm with a length of 5 m. The connection is a result of a pipe system.
Hexacomb Turbo
A vacuum system for multiple users

The authentic multiple user system for the paint shop. A new efficiency standard for vacuum systems that are designed for self-installation.

Wall mounted solution
• Turbine unit 1.3 kW / 230 V
• Swivel arm 5 m
• Hexagon energy head
• Holder for hoses and tools

Item No.: HEXA-COMB-T2W
Hexacomb Turbo

With the swivel arm you reach several working places in the preparation area.

Dust Extraction

NEW!

Including cabinet and accessories.

The cabinet model Hexacomb Turbo can also be embedded into a wall.

Cabinet model

- Turbine unit 1.3 kW / 230 V
- Swivel arm 5 m
- Hexagon energy head
- Holder for hoses and tools

Item No.: HEXA-COMB-T2S
The new Hexacomb combines recent product design, high efficiency and an user-friendly handling.

- Gallant design
- Adjustable compressed air connection
- Particularly silent
- Easy and safe removal of the dust bags

**Very silent:**
With a maximum of 64 dB more silent than a modern vacuum cleaner.

**Technical data:**

T-2 Mobile

The mobile working place in the prep area

All the necessary tools and materials you need at your hand.

Herkules T-2 Mobile

- Lockable tool case
- Rubber layered working and storage shelf

Integrated strong vacuum turbine

- Strong vacuum power 1.1 kW / 230 V
- Long life time (25,000 hours of operation)
- Automatic on/off for electronic and air-operated machines
- Automatic filter cleaning
- Silent turbine due to optimized insulation
- Dust-reduced disposal
- Compatible for all traditional sanding tools like Rupes, Hutchins, Festo SIA etc.

Item No.: T2M

Standard:
- Back for accessories and sanding materials
- Hose holder

Lacky Tender

The carrying- and storage-system for the paint preparation and final assembly

With the „Lacky Tender“ long ways to the storage are history.

Two stabilized basements in the lower area, a flexible grating ground and at any place with two small parts moun-
table box provides organization and clear view.

Prepared parts like doors, spoiler and wings can be stored in a safe way. The „Lacky Tender“ increases your productivity considerable.

- Cushioned rack for bulks
- Safety fixation with tension belt
- Continuous extractable bearings
- Box, grating rack and grab handle can be individually positioned
- Clearly grid boxes and racks
- Easy shunting

Item No.: 300-297

The Tender provides beside the gratings and racks for bulks additionally capacity for working tools and consumables.

Technical data:
Length 900 mm  Width 680 mm  Height 2020 mm  Weight 45 kg
Subject to technical changes.

Safety shunting in the body shop.

Lacky Bumper

The storage and transport rack for large parts

For safe storage and easy transportati-
on of bulky vehicle parts.

- Adjustable in many ways
- Padded shelves
- Easy to rank

Art.Nr. 300-399

Technical data:
Length 1200 mm  Width 800 mm  Height 2000 mm  Weight 28 kg
Aluminium step-bench

For painting large vehicles

An essential “helping hand” when painting the roofs of larger vehicles such as vans and small trucks. When it is not in use it can easily be put away – it does not require a lot of space.

Item No.: 300-257

Technical data:

- Loading capacity: 120 kg
- Weight: 5.0 / 6.5 kg
- Dimensions: 1000 x 330 x 325 mm
- 1190 x 330 x 600 mm
