Valid from the 5th June 2018

NEW  
TRAINING  
COURSE

## D9C: DIAGNOSIS AND CALIBRATION OF ADVANCED DRIVER ASSISTANCE SYSTEMS FOR CAR

This new course looks into the latest technologies being implemented by vehicle manufacturers for ADAS (Advanced Driver Assist Systems) the course will give a good understanding of the way that their systems work on the vehicle and how they will assist the driver.

These new systems will present challenges to the workshop when diagnosing and repairing them and many will also need to be calibrated when they have been removed, replaced or repaired. This course is both theory and practical based on live vehicles using the latest Texa ADAS calibration equipment including static and dynamic calibrations, parameters, errors, and activations.

If you would like more information or would like to book a place on the course, please email:

# RCCS BASE HARDWARE KIT

PACKAGE CODE - UKG6020

RCCS BASE HARDWARE KIT  
**£7,495**

DELIVERY & INSTALLATION IS AVAILABLE AT AN ADDITIONAL COST

RCCS Calibration Rig

2x Self Centering Wheel Clamps

2x Laser Support

## RCCS BASE KIT

RADAR CALIBRATION RIG

2X SELF-CENTERING WHEEL CLAMPS

2X LASER HEADS

2X LASER SUPPORT

DIGITAL MEASURE

DIGITAL CENTERING LASER

DIGITAL LEVELLING BOX

PACKAGE CODE - UKG6040

MASTER RCCS HARDWARE KIT  
**£10,595**

PLEASE NOTE ADDITIONAL BOARDS MAY BECOME AVAILABLE TO SUPPORT ADDITIONAL SYSTEMS & MANUFACTURERS
