Plastic Welding & Stapling

Bi-Gas Welder

Hot Air Welder

The Bi-Gas welder uses nitrogen to weld the plastic and enables a fast, safe and long lasting repair of plastic, thereby reducing your repair costs.

- ✓ Uses N2 Nitrogen to plastic weld and hot air to pre-heat the plastic
- ✓ 230v 16 Amp
- ✓ 320w power
- ✓ 2 different flow regulators
- ✓ Lightweight (only 6Kgs) and easy to use
- ✓ Fast and safe
- ✓ Trolley available to keep everything together including N2 nitrogen tank

The Hot Air plastic welder enables fast plastic repair, using a jet of hot air to fuse the plastics being welded together.

- ✓ Lightweight and easy to use
- ✓ 230v 16 Amp
- ✓ 320w power
- ✓ Flow regulator and display for temperature control
- ✓ Triangular Cutter and Roller included
- ✓ Excellent results
