

CBR 2109 | Alluvial tin replacement

Item no. 542040

CBR 2109 is a unique 2-component epoxy-based solder substitute used to restore metal surfaces of steel or aluminium. Formulated for final modelling of repulped dents or weld seams.

Properties:

- Good adhesion to aluminum, steel and zinc
- easy processing (sanding, planing)
- ideal base system for paint
- easy to mold
- great stability
- fast curing
- no collapsing or running

Scope of delivery:

- 1 x CBR 2109 cartridge 200 ml
- 3 x CBR 2109 mixing tubes

Recommended applications:

- Car body repairs
- Gap filling material
- Metal bonding
- Carrier system for auto-motive paints

Mixing tubes CBR 2109

Item no. 542042
