

## Cover

Item no. 478005

To protect the high-quality spot welding unit from dust, dirt, water.

With Velcro fastener on the side.

## Track extension set GT

Item no. 932103

Back-friendly work, relief of arms and shoulders:

When vehicles stand on a straightening bench, some of them are hard to reach.

The user would like to extend the balancer tube upwards. This means that the C-Gun hangs higher overall.

The Track extension set

- extends the straight balancer tube
- widens the wheelbase of the spot-welding unit
- effectively prevents the system from tipping sideways
- provides safety and protection

Scope of delivery:

1 x Balancer tube 630 mm

1 x Insulating webbing 650 mm

2 x Plate left + right

1 x Screw set | 32 pieces

## Anticorrosive concentrate WT1000 - 150 ml

Item no. 470008

Suitable for all welding equipment, especially spot welding systems.

Protects sensitive surfaces from corrosion caused by operation with cooling water.

Protects in particular all electronic components, copper cables and copper electrodes from so-called „contact corrosion“.

**Mixing ratio 150 ml for 80 litres of coolant.**
