

## T-RACTION 250

- System for straightening external steel and aluminium sheets.
- Uses compressed air to create a suction effect that ensures adhesion to the floor without requiring additional supports or fixtures.
- Manual hoist system with traction force up to 250 kg.
- Quick to install and easy to move thanks to the wheels at the base.
- Use with slotted washers or glue systems.
- Part of the SMART REPAIR range, products designed to increase the efficiency and quality of bodywork.

## DESCRIPTION

T-Raction 250 is a smart system for straightening external metal sheets.

Quick and easy to use, it uses compressed air to develop a vacuum effect which ensures perfect adhesion to the floor without the need for additional support or fixing points.

The system has a manual hoist that develops a traction force of 250 kg and it's the ideal aid for straightening thin sheets through slotted washers or glue systems.

Easy to install and to manoeuvre, it represents an indispensable tool for the reduction of working times in the body shop.
