

Designed and manufactured by Fast Mover Tools.

A compact mobile Panelstand for securely holding almost any car panel during preparation and finishing.

- The Triplex head enables the operator to choose a variety of configurations to suit whatever panel is being attached.
- Suitable for bonnets, doors, wings and tailgates.
- Will rotate through 180°.
- Very stable design.
- Securely lock in any position with radius plate locking device.
- Simple one man loading.
- Use in conjunction with FMT1234 Trim & Spoiler Kit for all those smaller items that only need colour coding.
- Use with FMT1650 Bumper support kit for retaining bumpers during repair and spraying.
- Large 8" rubber wheels roll easily over grills, sills and ledges.
